Date: _____

ONLINE ACTIVITY #2
Personalized Linux, and Git Cheat Sheet

Using any available resources (official Git documentation, online tutorials, or the built-in git --help command), research the following topics and create a personalized 1-page (A4) cheat sheet:

1. Basic Linux commands (command, sample usage) (at least 10)
2. Basic Git commands (command, sample usage, description (use your own wordings), common options/flags

git init	git restore
git status	git branch
git add	git checkout / git switch
git commit	git merge
git log	git tag
git diff	git clone

3. the three-tree architecture of Git

You are free to use any design or color scheme, just make sure it is readable.

Submission:

1. Use PDF as the file format for your cheat sheet.
2. Upload it to your GitHub repository
3. Submit the link here: <https://drive.google.com/drive/folders/1-Y6e6E6PoLyGgB0WZ8prRCNfolpV3cj0?usp=sharing>

Reminders:

Please put a "Reference" section in the cheat sheet for the materials you cited.

I DO NOT PROHIBIT the use of AI for this activity, but please declare the extent of the use.

Sample:

"The author used [Tool Name, Version] to [specific task] during assignment preparation. The author reviewed and edited the content as needed and takes full responsibility for the final content of the work."

Or

"I have not used any AI or AI-assisted technologies to prepare this work."

1. Basic Linux commands (command, sample usage) (at least 10)

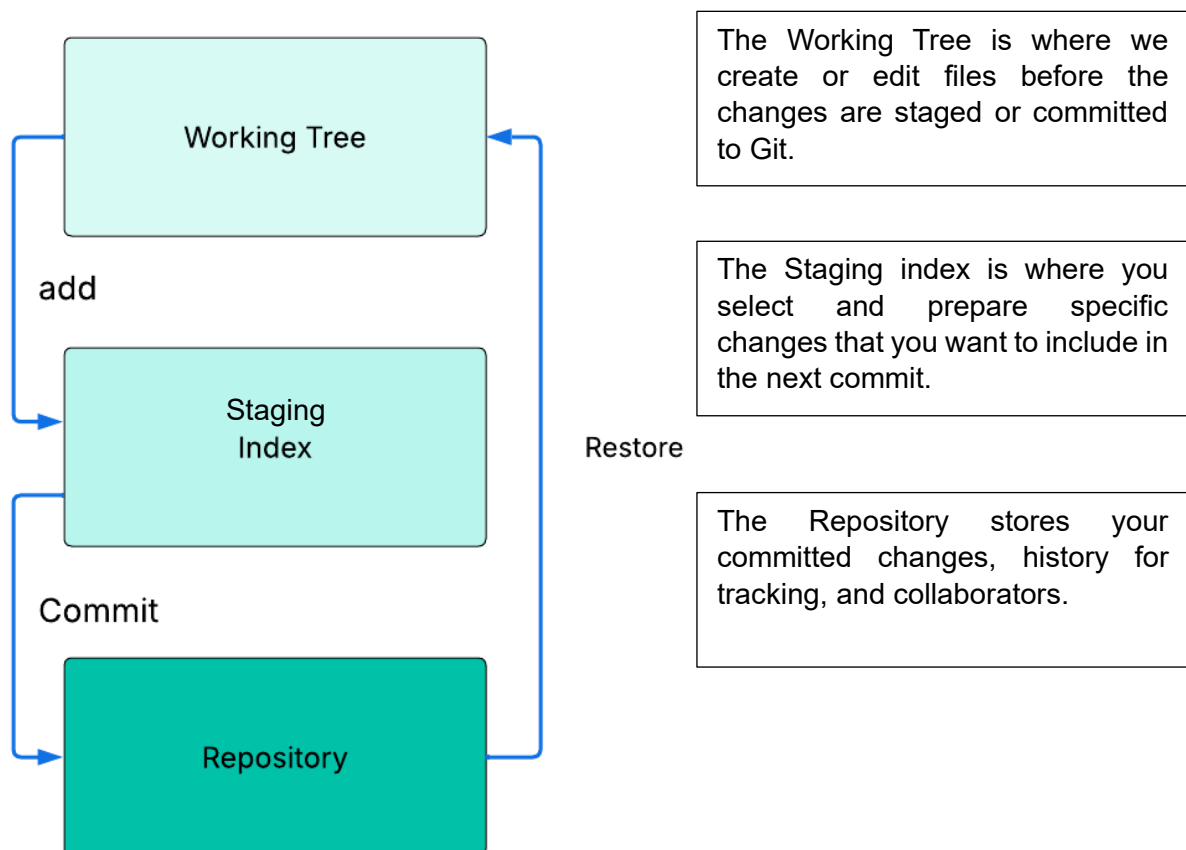

Command	Sample usage	Description
echo “ ”	echo “Hello World”	Use to print or display message.
mv	mv hi.txt hello.txt	Use to rename and move file from one directory to another.
rm	rm hello.txt	Use to delete files and directory
mkdir	mkdir ITEC-111	Use to create directory
ls	ls Documents	Use to list all files inside the directory
pwd	pwd	Use to display your current location
cd	cd ITEC-111	Use to switch directory
rmdir	rmdir ITEC	Use to remove empty directory
touch	touch Online-Activity.txt	Use to create an empty file
cat	cat Online-Activity.txt	Use to display file content

2. Basic Git commands (command, sample usage, description (use your own wordings), common options/flags

Command	Sample usage	Description	Common options/flag
git init	git init	Use to initialize to create git repository in current folder.	-b <branch>, --bare, -q
git clone	git clone https://github.com/202305958/202305958.github.io.git	Download a remote repository and create a copy.	-b <branch>, --depth, --single-branch
git status	git status	Use to show file status (tracked, untracked, and modified).	-s, -b
git add	git add .	Use to add all files to stage area.	. , -A, -p
git restore	git restore Online-activity.txt	Use to restore file to a previous tracked version.	--staged, --source, -p

git commit	git commit -m "Add git command"	Use to save staged changes as a commit history in the repository.	-m, -a, --amend
git branch	git branch ITEC	Use to list all branches available in the repository.	-a, -d, -D, -m
git checkout	git checkout ITEC111	Use to switch to specific branch.	-c, -C, checkout -b, -f
git merge	git merge Online-Activity2	Use to combine changes from different branch to the active branch.	--no-ff, --abort, --continue
git push	git push origin main	Use to upload local commits to a remote repository to github	-u, -f, --all

3. the three-tree architecture of Git
